

Year 4 – Summer 2 – Art & Design – Pupil Knowledge Organiser

What do I already know?		What am I learning now?	
- A pattern is when shapes, lines, letters, numbers, or colours are arranged in a particular way and repeated. - Printing is the process of transferring ink or paint from a design onto a surface. - Monoprint is a type of printmaking where the image can only be made once. - Relief print is a type of printmaking where the printing surface is cut away so that the design is raised on the surface.		- Who is Karen Lederer? - Can I print with two colour overlays? - Can I design a print using a motif? - Can I design a final print art piece? - Can I create a printing block to print my design? - Can I design and print a final art piece?	
Significant People		Key Knowledge: Printing Techniques	
 - An artist living and working in Brooklyn, New York (USA). - Her approach to printmaking is experimental. - Her prints are often of still life and use watercolours for the bright colours and texture.	 The impression method can be used on soft materials to make a print block/plate, e.g. polystyrene.  Using different tools and pressure, you can create marks, holes or grooves in the material.  The areas where there is an impression will not transfer paint on the desired surface when pressed.	 The final print will be a mirror image of the design on the print block/plate.  Repeating a design in different ways can contribute to the creation of an interesting motif.	relief printing A type of printmaking where the printing surface is cut away so that the design is raised on the surface. monoprint A type of printmaking where the image can only be made once. overlay A print block/plate that is laid over another to create layers of colour. Also, the process of printing over another print. impression To press into a surface to leave a mark, hole or groove. print block/plate The object that a design is made on to before transferring it on to the surface. pattern When shapes, lines, letters, numbers, or colours are arranged in a particular way and repeated. motif A decorative image or design, especially using/forming a pattern. mirror image When a design is identical to the original, but printed facing the opposite direction.
Key Knowledge: Printing Techniques			
To create a print with more than one colour in relief printing, there are two particular methods:  Create one print block/plate and apply the different inks/paints to specific areas.    Create two printing blocks/plates, each with different areas of the final design raised, and use a different colour on each.
